Chevron Lummus Global's ISOCRACKING Technology Chosen

Chevron Lummus Global (CLG) has signed contracts with Surinam's state oil company Staatsolie is on schedule with its Refinery Expansion Project (REP) having finalized basic design and is now moving into detailed engineering, procurement and construction. The refinery construction will begin in July 2011 when the first pile is driven. The REP contains a hydrocracking unit, utilizing Chevron Lummus Global's ISOCRACKING technology, geared to maximize middle distillates production with the flexibility to vary the product slate meeting varying market demands.
