### **CLG's Technology Award for Hengli Petrochemical Refinery Co., Ltd.**

Chevron Lummus Global (CLG), a joint venture between Chevron and CB&I, has been awarded a contract by Hengli Petrochemical Refinery Co., Ltd. for the technology license, engineering services and catalyst supply of a grassroots lube oil production unit to be located in Changxing Island, Dalian, Liaoning Province, People's Republic of China.

The 683 MMTA lube base oils unit will be utilizing CLG's ISODEWAXING and ISOFINISHING technology to produce high quality Group II & III base oils and is part of a new, large grassroots refinery. "At CLG we are excited to be part of this massive refinery investment for which we are designing one of the biggest plants in the world to produce Group II & III lube base oils. In addition, the unit will enable Hengli to produce high-valued white oils, putting Hengli into a unique position in the Chinese market," said Leon de Bruyn, Managing Director of CLG.
