### Kuwait National Petroleum Corporation Selects Chevron Lummus Global for Resid Upgrading Technology for Clean Fuels Project 2020

Kuwait National Petroleum Corporation (KNPC) selected Chevron Lummus Global (CLG) for resid upgrading technology for the Clean Fuels Project 2020 (CFP2020). The CFP2020 will upgrade and modernize KNPC's existing refineries at Mina Al Ahmadi (MAA) and Mina Abdulla (MAB) to produce clean fuels. As part of the modernization project, CLG will execute the extended engineering design for 50,000 BPSD and 150,000 BPSD RDS units at the existing MAA and MAB refineries respectively. The RDS units will utilize CLG's commercially demonstrated proprietary UFR reactor technology.
