Preemraff Celebrates New Hydrocracker in Sweden, Using Chevron Lummus Global's ISOCRACKING Technology

Richmond, CA, In May of 2006, Prime Minister Goran Persson of Sweden inaugurated Preemraff Lysekil's ISOCRACKING unit, licensed by Chevron Lummus Global, LLC (CLG).

With the new hydrocracker, Preemraff Lysekil refinery in Sweden strengthens its competitive position when it comes to the production of high quality fuels, and the conversion of high sulfur vacuum gas oils to sulfur-free diesel fuels directionally meets the goal of reducing carbon dioxide emissions. Using CLG's unique ISOCRACKING® catalysts, process design and experienced technical/operating assistance, the 58 KBD plant started up within three years of detailed design and construction.

CLG licenses refining hydroprocessing technologies and sells catalyst systems worldwide, and is a 50-50 joint venture between Chevron U.S.A. Inc., a wholly owned subsidiary of Chevron Corporation, and ABB Lummus Global.
